ABOUT ME

My name is Jude Ifeanyi Okpe, a graduate of the University of Nigeria, where I pursued a double major in Physics and Education. This rigorous academic background has equipped me with multi-dimensional problem-solving skills and a strong adaptability to various working environments.

In addition to my academic achievements, I have developed proficiency in web development, specializing in WordPress, PHP, JavaScript, React (Next.js), and CSS/HTML. My diverse skill set and robust educational foundation enable me to approach challenges with a comprehensive and adaptable mindset, making me a valuable asset in any professional setting.

WORK EXPERIENCE

Nanocode Programming Limited

Mid level | Backend web developer
Nsukka , Nigeria
2024-10-01 | Currently working here

As a Backend Web Developer, I build, enhance, and maintain server-side applications using Node.js, Django, and PHP to ensure our web services are secure, scalable, and high-performing. I design and implement RESTful APIs, integrate with frontend systems, and work with both SQL and NoSQL databases to optimize data storage and retrieval. By monitoring application performance, refactoring code, and handling troubleshooting, I ensure efficient and reliable system operations. I prioritize security, applying best practices in data protection, authentication, and secure coding standards. In addition to writing tests and debugging, I actively collaborate with cross-functional teams, participate in code reviews, and contribute to knowledge sharing to drive project success and maintain high code quality.

Digital Dream ICT Academy

Mid level | Fullstack web development tutor
Enugu , Nigeria
2022-03-01 | 2023-01-01

As a Web Development Instructor, I specialize in educating learners on a comprehensive range of technologies crucial for modern web development. My role involves teaching foundational and advanced courses in HTML, CSS, Python, JavaScript (including libraries like jQuery), PHP, and React. In this role, I design and deliver engaging curriculum modules that cater to students' diverse skill levels and learning objectives. I focus on practical, hands-on training, equipping learners with the skills needed to create dynamic and responsive web applications. Through interactive lessons and real-world projects, I empower individuals to master these technologies.

Prince Dike

Entry level | Website development Lead

Ikorodu , Nigeria

2021-08-01 | 2022-02-01

1. Website Development:
 - Design, develop, and maintain responsive and visually appealing WordPress websites.
